## Migrate Your Controller

Finally, a simple solution for replacing your obsolete control technology. Avoid downtime by being proactive. **Panelicity® Series 36** has the same functionality and familiar displays as your existing controller. It is preconfigured with standard control strategies. Easily replace your obsolete 1/2 DIN (3x6) controller with modern technology featuring intuitive menu-driven templates.

### Reasons to Choose Panelicity

- Easy Installation and Configuration Migration
- Familiar Operational Displays
- Smaller Footprint
- Modern Technology
- Lower Total Cost

### Cost Effective

**Panelicity®** saves you money. Simple menus allow all entries from the display. Your existing applications are easily migrated and familiar, so operator retraining is not required. The look and feel remain the same.

### Modern Technology

- Full-color touch screen with integrated PLC
- Field-proven hardware with an installed base of 6,000+ worldwide
- Advanced features such as trending and alarm data logging
- Secure backups on a USB flash drive
- Implement up to four (4) control loops with a single controller

### Easy Installation

The **Panelicity®** 1/2 DIN (3x6) controller extends less than 2 inches into the panel for use in areas with depth restrictions. Panel depth is 2.25 inches when an ethernet cable is attached.

### Ask about Trade-in credit

Trade in your old Moore 352/353, MOD30ML, Bailey CLC/SLC or other 1/2 DIN controllers for credit towards Panelicity.
