

Panelicity® Series 36

Process Automation Control Made Simple

3x6 Controller (1/2 DIN)

Migrate Your Siemens Moore 353 Controller

Finally, a simple solution for replacing your obsolete control technology. Avoid a costly shutdown by being proactive. **Panelicity® Series 36** has the same look and feel as a Siemens Moore 353 Controller. It is preconfigured with the familiar standard FCO control strategies that you rely on. Easily replace your obsolete 3x6 controller with modern technology featuring intuitive menu driven templates.

Reasons to Choose Panelicity

- Easy Installation and Configuration Migration
- Familiar Operational Displays
- Smaller Footprint
- Modern Technology
- Low Total Cost

Cost Effective

Panelicity® saves you money. Simple menus allow all entries from the display. Your existing applications are easily migrated and familiar, so operator retraining is not required. The look and feel remain the same.

Trade in your existing 353 controller for credit towards a new **Panelicity®**.

Modern Technology

- Full-color touch screen with integrated PLC
- Field proven hardware with an installed base of 6,000+ units around the world
- Advanced features such as trending and alarm history
- Secure backups on a USB flash drive
- Implement one or multiple control loops with a single controller

Easy Installation

The **Panelicity®** 3x6 controller extends less than 2 inches into the panel for use in areas with depth restrictions. Panel depth is 2.25 inches when an ethernet cable is attached.

Controller Installed In Panel

Panel Cutout

Side View

A simple cutout in your panel is all that is required to install **Panelicity®**.

The controller draws low power, consuming under 500mA. The unit is slim and mounts easily. A 24V power supply is required and is available as an option when ordering.

Application Database Conversion

Classic Automation provides a free evaluation of your applications for conversion. Most applications will not require this step. Just send us a copy of your program when possible, and pictures of your wiring.

Typical applications for *Panelicity*® include:

- Industrial temperature, pressure, flow, level control
- Boiler combustion control
- Boiler level and feed water flow control
- Chemical liquid blending for paint, inks, dyes, etc.
- Pressure control for critical control loops
- Many others

Operator Interface

The *Panelicity*® displays feature intuitive icons for navigating menus compared to traditional 3x6 controllers. Typical setup parameters such as I/O types, ranges, and PID parameters are logically organized with no need to learn special software. Up to 5 alarms and 5 digital outputs can be defined for each control loop. Control templates have a data entry table to document your settings for back-up. Security access authority is provided to eliminate unauthorized field changes.

Controller Technical Specifications

Power Supply Voltage	12-28 VDC
Power Consumption	<500 mA
Operating Temperature	32°F (0°C) to 131F (55°C)
Storage Temperature	-4°F (-20°C) to 185°F (85°C)
Relative Humidity	5% to 95% non-condensing
Front Face Rating	IP65 (water resistant)
Housing	ABS, Polycarbonate
Touchscreen	Resistive, 4 wires
Micro-USB	Host 2.0
MODBUS TCP	Master/Client <i>Standard configuration allows Slave functionality</i>
Panel Cutout	Width 2.65" (68mm) x Height 5" (127mm)
Controller Dimentions (Including Bezel)	Width 3.15" (80mm) x Height 6.14" (156mm) x Depth 1.46" (37mm) <i>*Depth is the depth behind the panel. An additional 0.25" is needed for use with Ethernet cable.</i>
Ethernet	10M / 100Mbit/s - auto recognition Supports patch or crossover cable
Approvals	CE Approved, UL Approval Pending
